- Challenges of current TTS systems
- Opening up new markets & applications

Who we are

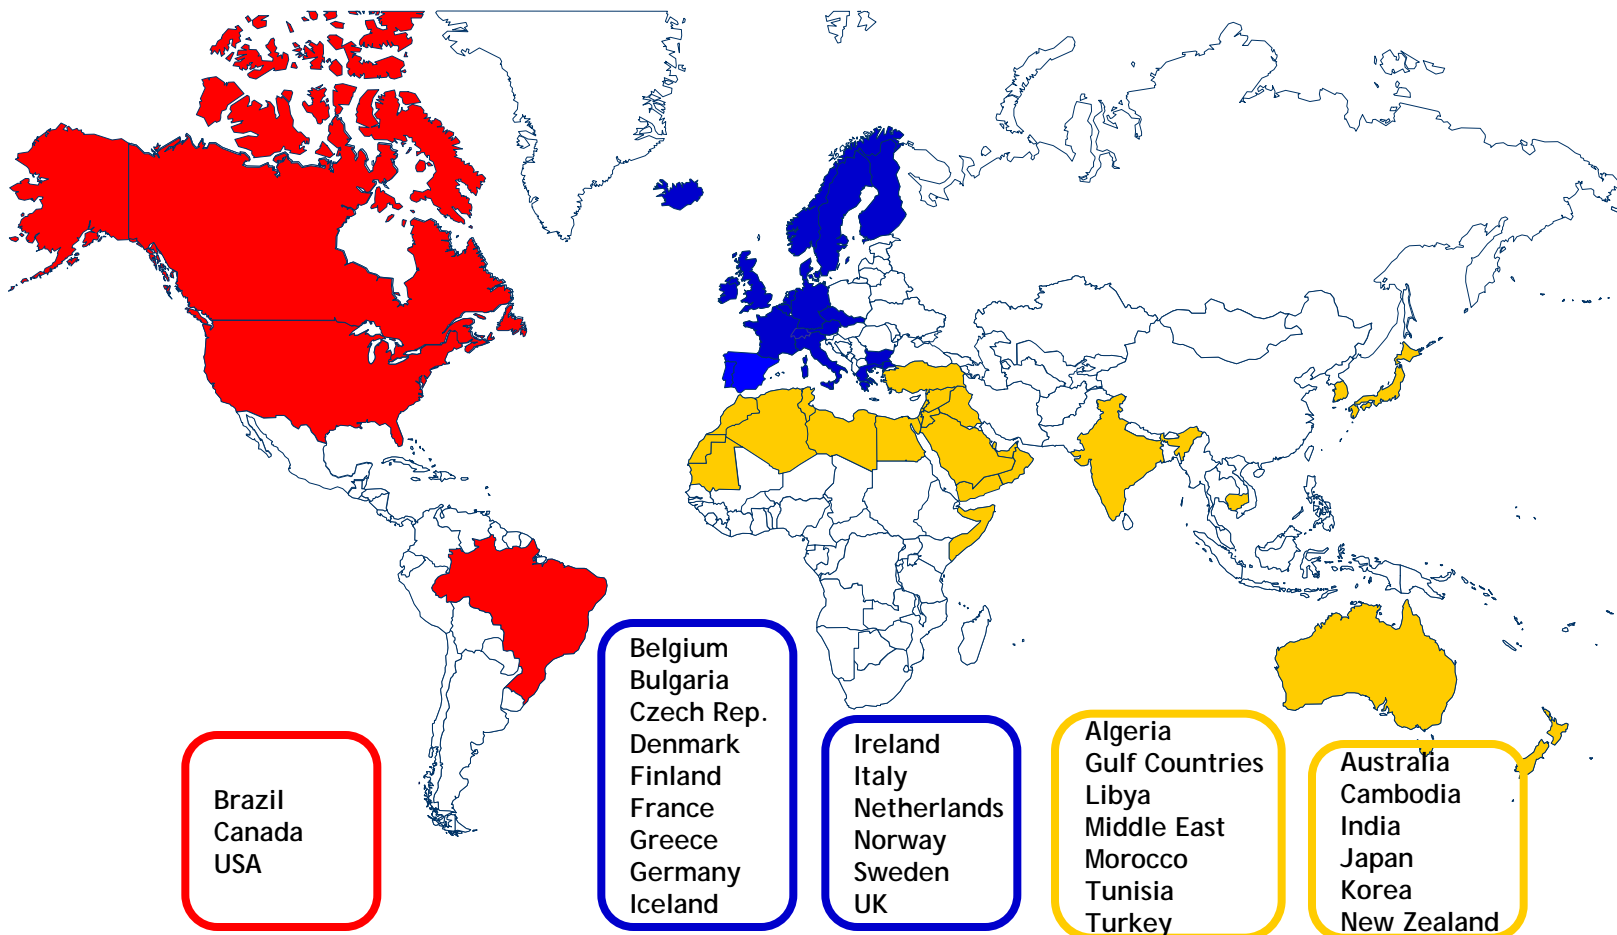

- **Provider of Speech Solutions since 1997**
 - Text-To-Speech
 - Speech Recognition
 - Professional Services
- **Expertise in 6 market segments :**
 - Telecommunications
 - Assistive technologies
 - Multimedia
 - Mobile Devices
 - Automotive
 - Industrial

Geographical perspective:

19 languages; > 25 countries

Current ASR & TTS market offering

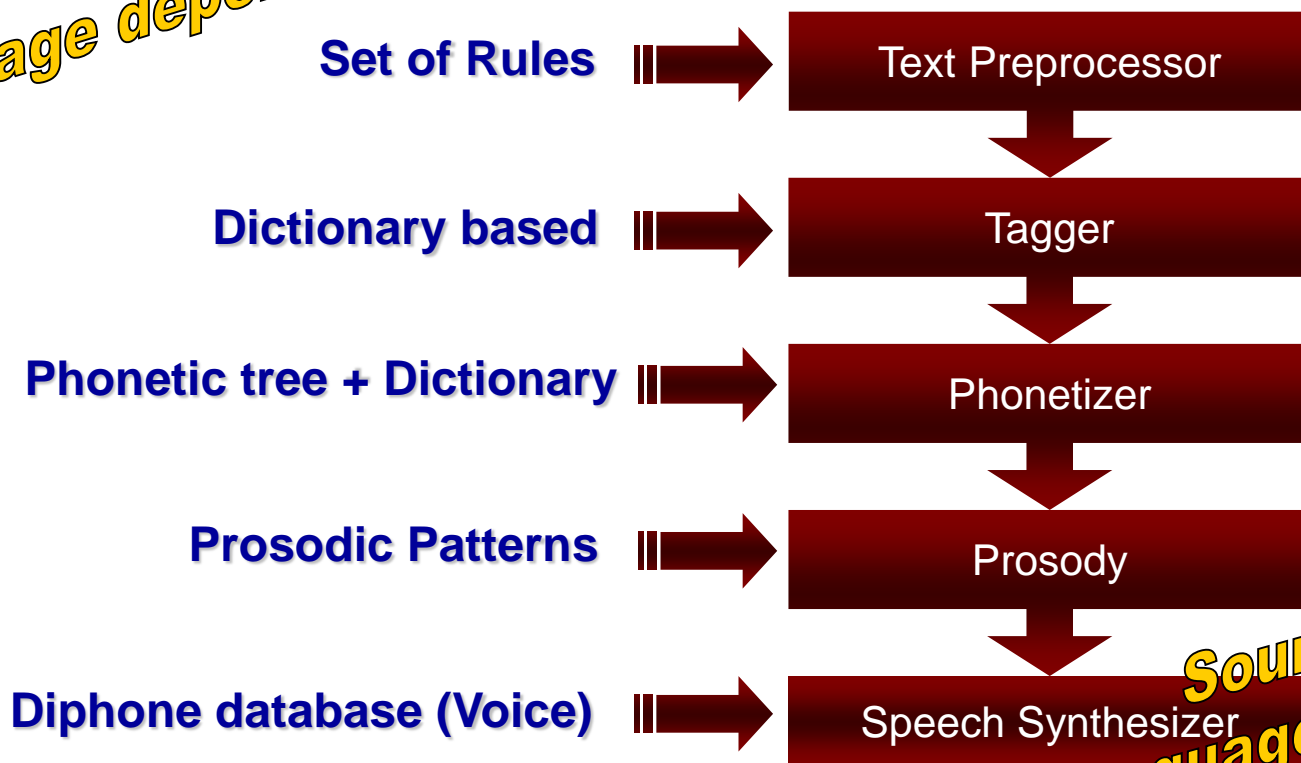

Technology	Market	Telecom	PC/MM	Embedded		
				Ind	Auto	Mobile
TTS	Formant	(X	X	X)
	Diphone	(X)	X	X	X	X
	Unit Selection	X	X	X	X	
ASR	Small vocab. C&C			X	X	X
	Medium vocab. C&C	X	X	X	X	
	Large vocab.	X	X			
	Dictation		X			X

X General market coverage

Yellow box Babel's offering

Babel's approach towards TTS

*Data =
language dependent!*

*Source Code:
Language Independent*

Challenges of Current TTS Systems

■ Application-specific text preprocessing

- "CO-2" = Colorado 2 
- "CO-RD 239" = County Road 239 
- "CO-PILOT LN" = Co-pilot Lane
- "I-195 EAST/SR-112 WEST/AIRPORT EXPY" = complex text with slashes, abbreviations, etc. 

■ Pronunciation of proper names

- "Thibodaux" = French origin, English language rules will fail
- "Eichelbergertown" = long difficult name

Challenges of current TTS Systems

- **Voice quality & natural intonation**

- Traffic announcements, advertising, natural stress,...

- **Phonetisation & proper names**

For ASR systems

- “Belen” = Spanish origin, English language rules fail
- “Raton” = French origin, English language rules fail
- “Bourbonnais” = French origin, English language rules fail
- “Pesce Pasta Tre” = “Tre” is Italian

■ Automotive - Navigation Technologies

- Customer Problem :
 - Accurate Text-To-Speech and Speech Recognition for Navigation systems
- Solution :
 - Development of production tools for efficient phonetization of proper names
 - Multiple pronunciations
 - Manual check of each proper name 
- Result :
 - Hundreds of thousands names manually checked 
 - Demonstrations presented in Frankfurt, Madrid, etc.

Opening up new markets & applications

- **Public Announcements - Fulltec**
 - Customer Problem :
 - Broadcast of variable, repetitive messages
 - Solution :
 - High quality Text-To-Speech
 - Corporate voices
 - Combined use of recorded prompts and TTS
 - Result :
 - First deployments in supermarkets

- **Language Learning - Franklin**
 - **Customer problem :**
 - Needed low-footprint TTS for various platforms & languages
 - **Solution :**
 - Advanced TTS model for low footprint; adapted to various platforms
 - Developed most optimal solution with specific Franklin data & Babel TTS
 - **Result :**
 - Homogenous product series of talking dictionaries on large number of platforms

■ SMS2Speech

- Customer problem :
 - Convert text SMS into speech to expand the usage of SMS.
 - No solution handling the "SMS language"
- Solution :
 - Specific dictionaries ("CU") & Text Preprocessor ("HAND") frequently updated
 - Automatic Language Recognizer
- Result :
 - Deployment of the solution on December 1, 2003
 - "Bj rdv ce soir 20h. S ke tu viens seul? A+"
